***Reasons for Allowance***

1. The following is an examiner's statement of reasons for allowance:

The instant application is deemed to be directed to a non-obvious improvement over the invention patented in Pat. No. 6,907,722 to Tanaka. The improvements are a control means which sets a control operating value for operating the compressor at a predetermined operation point, and controls the inflow quantity regulating means and the recycle valve based on the control operating value, characterized in that the control means has a first control signal generating means which generates a signal increasing with an increase in the operating value as a control signal for the inflow quantity regulating means when the control operating value is a predetermined value or larger and a second control signal generating means which generates a signal decreasing with an increase in the operating value as a control signal for the recycle valve when the control operating value is smaller than a predetermined value.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Prior Art***

The prior art made of record but not relied upon is considered pertinent to applicant's disclosure and consists of 3 patents.

Art Unit: 3745

Saxena et al. (6,602,057), MacLeister (5,798,941), and Gaston (5,195,875) are cited to show different methods for controlling compressors.
